

# Learning Technology: What you will see in the classroom

- Students exploring a variety of technologies in their home, school and community
- Technological vocabulary is being used to describe ideas, processes and plans
- Creative risks being taken
- Encouragement of reflective thought and action
- Making connections with prior learning
- Integration where appropriate across all curriculum areas
- Promote student engagement and ownership through the learning process
- Mistakes and failures are all part of learning
- Students working in flexible groups, pairs or as individuals.
- Students are experiencing a range of technology
- There is a focus on solving or designing a solution to a problem and then taking it to the next stages
- Questions being asked by the students and the teacher.
- Individual needs of the students being met.
- Students are involved in testing, trialing, modifying, adapting and evaluating
- Students working collaboratively and cooperatively where appropriate.
- Digital tools are used daily for learning
